

Applications are invited for the position of

Fabricator/Maintenance Engineer

Attractive Salary & Benefits, based in Ripon

Ripon Select Foods Ltd is an established, successful, family-owned business manufacturing dry food ingredients used in many leading branded products. We aim to offer job satisfaction and security. We are looking for a highly motivated and skilled Maintenance Engineer to join our dedicated maintenance team.

- The full-time role is 40 hours/week, working days Monday to Friday. It includes being part of a call-out rota to support the shift engineers. Some overtime may be required.
- The ideal applicant must be positive, reliable and responsible, with transferable engineering skills including knowledge of industrial plant and plant maintenance and fabrication/welding skills; some knowledge of PLC controls and electrical work would be an advantage.
- Key responsibilities include supporting the production process, carrying out preventative maintenance as well as working on breakdowns, fabrications and repairs.

Benefits include a competitive salary, contributory pension scheme, workwear, generous holiday allowance, free on-site parking, training.

To apply, application packs are available by:
